

# OZOLEA-MAST

**BOTH  
LACTATION  
AND  
DRY!**

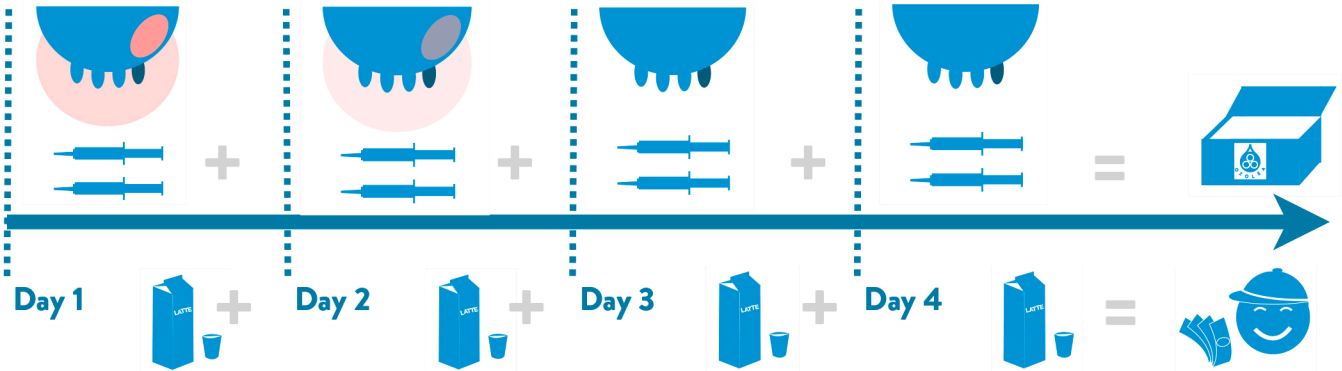

**IN LACTATION:** one applicator in the sensitive quarter after each milking for 4 days

### PROMPT USE

Apply at very first signs of tissue unbalance: do not wait for clear symptoms.

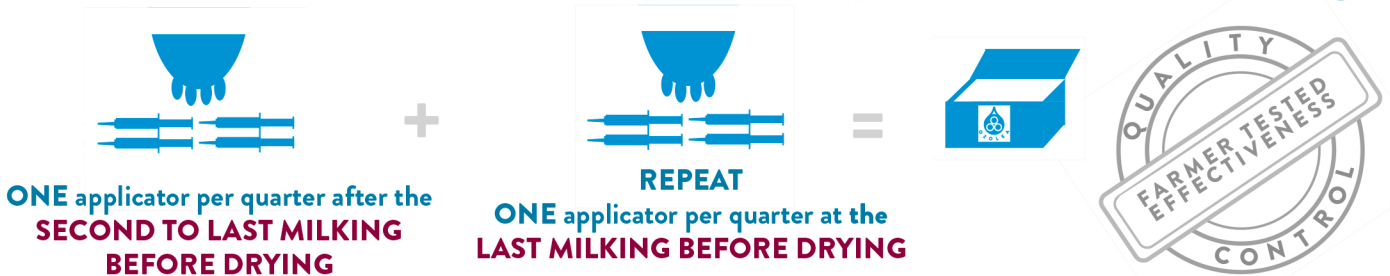

### A PROTECT TISSUE REGENERATES ITSELF

Ozolea Bioengineered Oil creates a filming barrier in contact with the tissue, protecting it and providing a temporary relief from bacterial insult. The regenerated tissue successfully performs its natural defensive mechanisms.

**KEEP ON SELLING YOUR MILK EVERY DAY!!**

**PRE-DRY USE:** one applicator per quarter after the last two milkings.

**NEW**

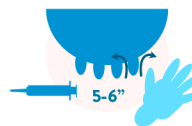

**THE ONLY NON-MEDICINE VETERINARY PRODUCT THAT RIGHTFULLY CLAIMS INTRA-MAMMARY USE**

complying with the EU regulation

**SAFE** for the consumer, for animals, for the farmer, for the veterinarian, for the pharmacist!

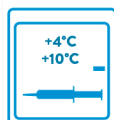

**NO MILK OR MEAT WITHDRAWALS**

**GENTLY RUB**  
5-6 seconds after each application

**NO VETERINARY PRESCRIPTION needed in the EU**

**KEEP COOL UNTIL READY TO USE**

**ASK YOUR VETERINARIAN!**

OZOLEA-MAST is not a veterinary medicine: it supports the tissue functionality when it is not yet severely compromised.

A prompt application is essential to obtain the desired results.
